

Assignment 5

(A PIECE OF CAKE Java Programming Project)

(Due **before Tuesday (10/12/2010)** class at Moodle)

Your name:	Score:
------------	--------

Important Notice:

1. **You must submit your work at Moodle.**
2. **You code must follow Java Code Convention** (proper indentation, blank line(s), at least 1~2 lines of comments at beginning of the class and important methods)—this will account for **30%** of the project scores!

Create a Java Project that implements and tests the Case Study: Payroll System Using Polymorphism in the textbook, Section 10.5 (pages 408~423):

- You do NOT have to write any code—you may copy the code in Fig. 10.4, 10.5, 10.6, 10.7, 10.8, and 10.9—using this sample code without change is encouraged!
- You can get the code from the following resources:
 - Textbook,
 - Chapter 10's Slides on the course web;
 - Chapter 10's source code on the course web (this is the simplest way: download the compressed file, extract it, and then—open—copy—paste and you are set!)
