Assignment 1
(Java Lab Practices)
(**Due by the lab on Thursday, 1/28/2009**)

Your name:	Score:

Lab preparations:
1. Create a directory "CSC201J" on the "H:" drive.
2. Create a subdirectory "Assignment01" under the "CSC201J" directory you just created.
3. Start up NetBeans6.8 and work on the Java projects/programs (you need to create a new project (for each of the following program practices) with *a meaningful name* under the directory "**H:\CSC201J\Assignment01**").

Java Programming Practices Chapter 2's Code Examples.
For each of the following examples, you must:
1. Write down (copy, **handwrite**, do **not type**) the example code from the textbook or course website in the space below each question (comments are **NOT** required!).
2. Create a project (with a ***proper/meaningful*** name under the directory "**H:\CSC201J\Assignment01**") for each example program.
3. Compile and test the sample code.
4. Make some changes to the code (so that the output should be different from the output in the textbook).
5. Show the result to the instructor (make sure the instructor **sign on** each tested program).
6. Turn this assignment to the instructor by the **due time**.
